

WJ GROUP

Expert in Water Management

Welcome

Established in 1981, WJ Group are water management experts, combining a global reach with local expertise and an impressive track record worldwide. We offer a complete design, operational, installation, and maintenance service for every level of water management. The team at WJ are dedicated to providing total solutions to all sizes of businesses, from all industry sectors throughout the world.

Over the last 35 years, the WJ Group has delivered water management excellence, ranging from small domestic contracts to some of the largest infrastructure schemes across the globe. Regardless of the project, our highly skilled and experienced team guarantees you a personal, competitive and quality service delivered by local experts, backed with a long global heritage of excellence.

With over 2,500 projects completed across the globe, WJ Group are recognised as leading the way in water management.

What we stand for

We are defined by our people. The service we provide relies heavily on the expertise and skillset of our entire team. Our management and on-site crews have all been highly trained through rigorous in-house and external training programmes. Moreover, our staff own the company, with WJ shares divided among the team. This governance model creates fantastic loyalty and pride which is reflected in our work.

Our services detail what we do, but it's our values that describe how we do it – who we are, how we work and what we stand for. No matter where in the world you engage with the WJ Group, if you ask us to describe what it's like to work with us, our values are what we talk about.

Our Mission To deliver confidence through excellence.

Our Vision To be the water management partner of choice, worldwide.

Our Values Confidence • Pride • Trust • Conscientiousness

Global reach

WJ Group has a proven and impressive track record in water management across the globe. Our insistence on providing local expertise to each region not only ensures expert market knowledge but also a cultural appreciation of each project we undertake.

These are just the locations in which WJ Group currently has fixed office locations. However, we operate on a truly global scale and deliver projects far beyond these countries.

Services & Sectors

WJ Group provide services across the full breadth of water management; from project design and consultation to installation, ground source energy systems, ongoing maintenance and much more. Our specialist teams of highly skilled experts operating in each region worldwide are united by the fundamental objective underpinning their work; to deliver exceptional results with confidence.

The services that we offer vary by the demand for each region in which we operate. However, our local specialist experts offer the same in-depth knowledge, relevant to their respective territories and backed by WJ's core principles of excellence.

Whatever the type or scope of the client's requirement, WJ Group's global teams deliver the same great level of customer support, project management and expertise. We work with small contractors, national/international contractors and consultants across all manner of projects from basements to airports, railways to infrastructure and much more.

A trusted partner

Health & Safety

WJ Group is fully committed to safeguarding the Health & Safety and wellbeing of each employee, other site staff and the general public.

WJ has an experienced workforce that is trained and qualified to a range of standards that include CSCS/CPCS/NVQ who are committed to hazard and risk minimisation alongside safe working practices.

Accreditations

We are extremely proud of our heritage and reputation across the world, bolstered by our accreditations and industry recognition for excellence.

What our clients say

"WJ designed and installed an effective solution to control the groundwater for our basement excavation. Their work was carried out efficiently, safely and to programme."

Laing O'Rourke

"Positive helpful staff throughout a challenging project."

Derry Building Services

"Very professional and have great technical and practical abilities."

Ward & Burke Construction

"Very satisfied with service from the initial site meeting through to demobilisation future."

CPL

"Proper followup, professional team personally present at the time. Supported the project at all levels."

Ceinsa Construction

"Overall the dewatering works were a success and I felt WJ Groundwater were easy to deal with and extremely helpful when called upon. I hope to work with them again in the future."

Careys Civil Engineering

"Great, friendly service. Very helpful and easy to work with."

M Lambe Construction

"WJ designed and installed an effective solution to control the groundwater for our basement excavation and deep core areas. Their work was carried out efficiently, safely and to programme project."

Brookfield Multiplex

"WJ's installation team was excellent. Of special note was WJ's expertise in contractor assistance to mitigate risks for our forward planning."

Hochtief Murphy JV
